

Recruitment of a Permanent Financial Controller – Confidential Assignment

Rapidly growing privately owned branded business, Hampshire

Brief

Formed overseas in the late 1980's the business had created a niche product which they then successfully marketed across the globe. Now based in the UK with distribution throughout the sports world the business has diversified and developed into a market leading brand. The company was investing heavily as it looked to continue its evolution and to diversify into new markets.

Response

Working on a retained basis Venture Recruitment Partners moved swiftly to identify a shortlist of 6 appropriate candidates for interview for the role of Financial Controller. This was a critical hire, reporting directly to the Managing Director, for the business as it looked to embark upon a period of rapid but sustained growth. The process was conducted against very tight timescales as the organisation had immediate challenges and development targets to reach.

Outcome

The interview and offer process was turned around within 4 weeks and a successful appointment was made to the satisfaction of all parties. The new Financial Controller, an ACCA Qualified with excellent senior finance experience in the SME Marketplace, was able to join within a few weeks.

"We were looking to recruit a new Financial Controller into the business to help us drive our growth plans for 2015 and beyond. We approached Venture Recruitment Partners to work as our sole recruitment partners with a brief to find us the right individual to achieve our aims but within a tight timescale. Venture provided an efficient and expedient service to find us an excellent candidate who has subsequently proved to be a superb addition to our senior management team."
